Revised on 14 Dec, 2013

**The auxiliary information contains 2 (two) tables and 1 (one) figure**

**Table S1.** A description of state-level fire law articles and regulations systems and lists of states in each fire policy class used in Figure 9.

**Table S2.** Principal crop area planted as reported by U.S. Department of Agriculture for each management class. These numbers were used to normalize interannual changes for cropland active fires in Figure 9b.

**Figure S1.** Time series of Aqua MODIS active fire detections from 2003-2010 for (a) the entire U.S. and for (b) large wildland, cropland, and prescribed/other fire types. This figure is parallel to Figure 3.
